STEP 1

IRON THE ADHESIVE PAPER TO THE CONDUCTIVE FABRIC. PLACE CONDUCTIVE FABRIC PATCH DOWN FIRST. THEN PLACE THE ADHESIVE PAPER (PAPER SIDE UP) ON TOP OF CONDUCTIVE FABRIC. THEN PLACE COTTON SCRAP OVER BOTH PIECES BEFORE IRONING.

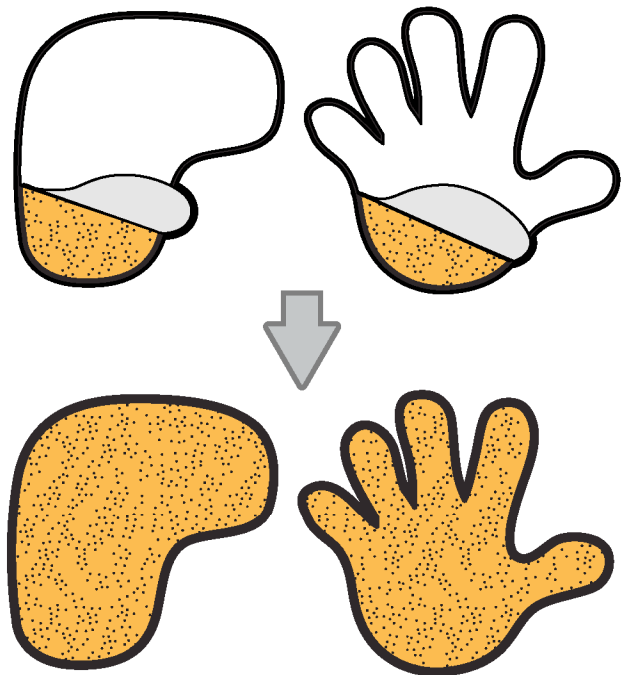

STEP 2

STACK AND IRON IN THE SAME WAY AS WITH PATCH.

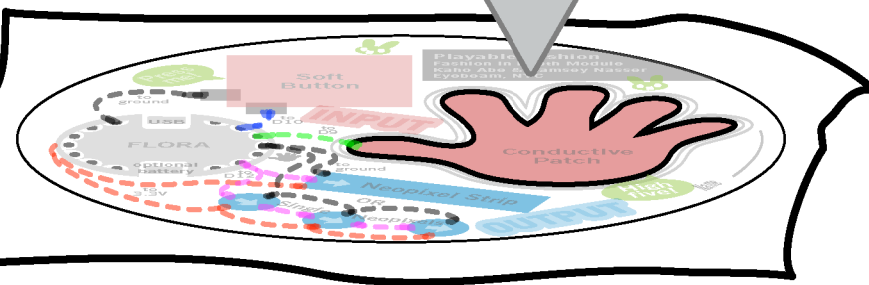

STEP 3

PEEL PAPER OFF LEAVING ADHESIVE LAYER ON CONDUCTIVE FABRIC

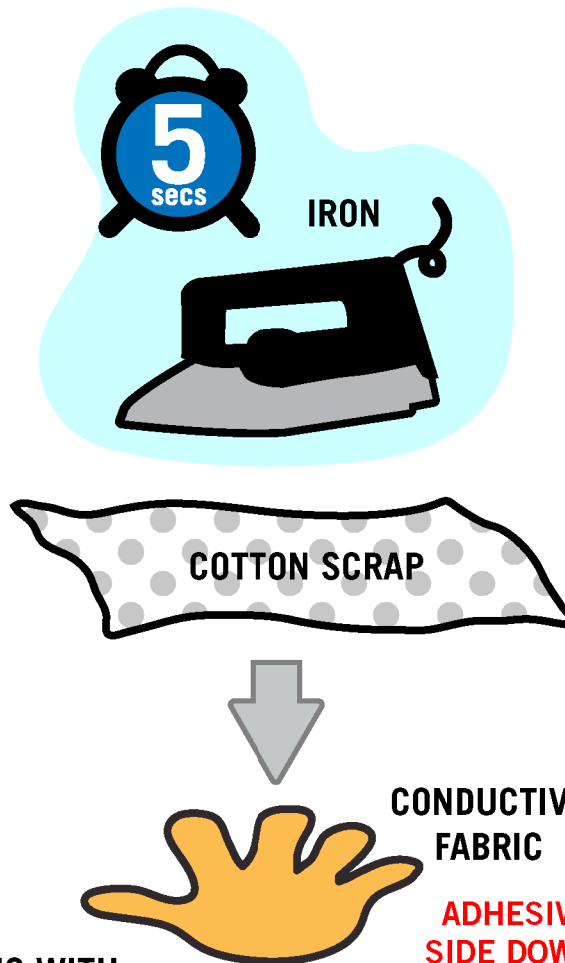

Taking hoop off your printed fabric can make it easier to iron patch on.

PRINTED FABRIC WITH HOOP REMOVED

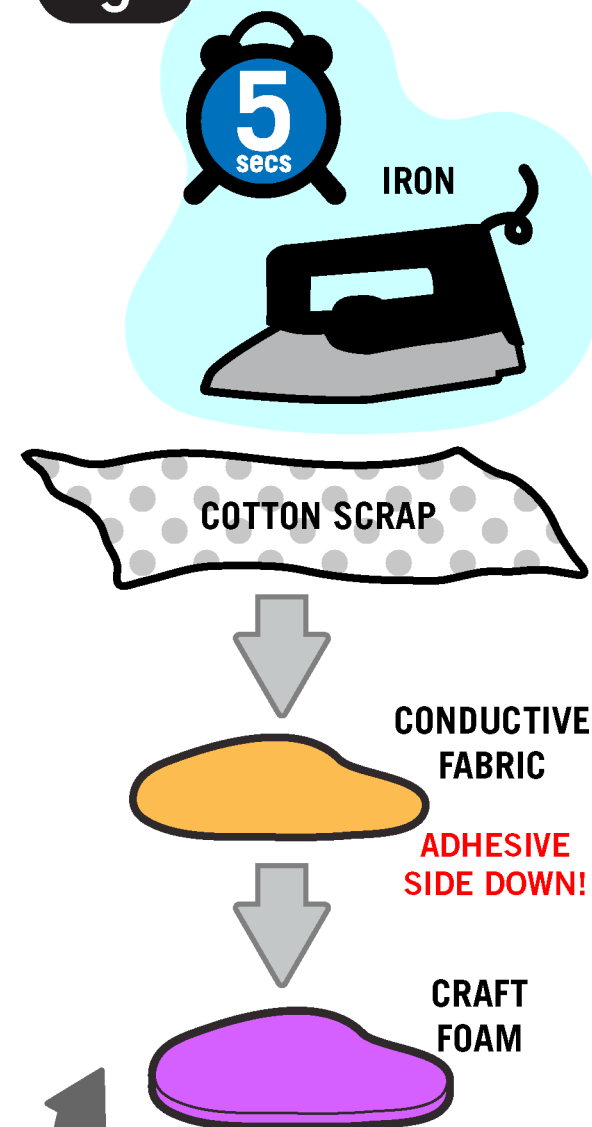

STEP 4

REMOVE HOOP FROM PRINTED FABRIC TO IRON CONDUCTIVE PATCH TO PRINTED FABRIC.

STEP 5

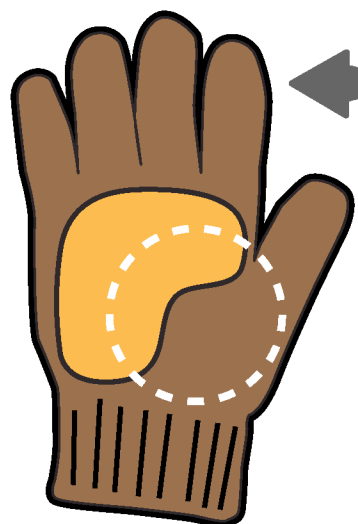

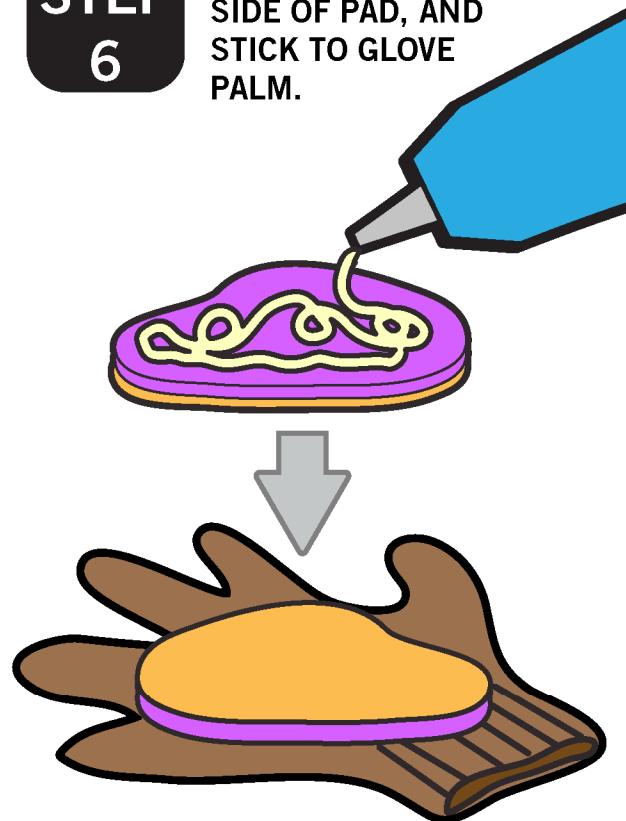

IRON CONDUCTIVE FABRIC TO CRAFT FOAM.

Make sure craft foam is under conductive fabric when ironing. If craft foam is on top, heat will not come through craft foam.

STEP 6

GLUE GUN CRAFT FOAM SIDE OF PAD, AND STICK TO GLOVE PALM.

Make sure to leave enough room for the thumb. The curved part of the pad should fit around the thumb.

STEP 7

TEST YOUR GLOVE & PATCH BY CONNECTED THEM TO THE FLORA. USE THE SAME CODE FROM THE SOFT BUTTON EXERCISE.
